Copy of Review of Exempted Wells DOGGR 0515 0617 tables (2).xlsx

I need this for a meeting at 8:30 tomorrow morning. Could you please print it in color and leave on my chair?

I numbered the disposal wells, and if you add those and the one with no status, there are 20.

Subject: Summary of Review of the 19 Disposal Wells DOGGR claims are injecting into an exempted aquifer

Hi all,

I reviewed the highlighted wells in the May 15, 2015, Attachment B (the ones that were being removed from the list because they converted to O&G production, were plugged & abandoned, or are injecting into an exempted aquifer. I focused on the wells categorized as disposal wells. I cross-checked the disposal wells with the June 17 table. In short, there are 5 wells that are of concern, one of which is in a potentially impacting a water supply category.

Attached is a spreadsheet with my review.

Thanks,

Lisa
